# XIOTRI DeFi

bXIOT Token Release

06/09/2020

XIOTRI

XIOTRI is a new take on DeFi. The goal is to create a new technology that favors the individual over the affluent and has longevity.
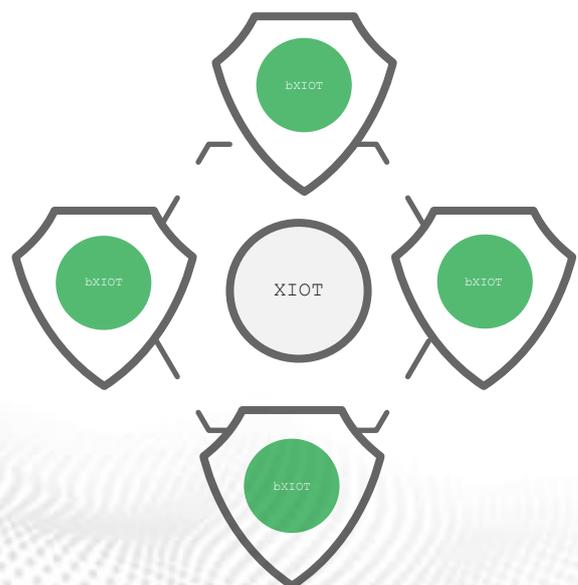

Most of the current systems in the market are not trustworthy. Their only goal is to enrich their creators and quickly exit the scene.XIOTRI has formulated a unique algorithm that rewards its participants for staking XIOT tokens and other assets, but disincentivizes being overly greedy. The XIOTRI platform is designed to continually provide value to its holders by reducing inflation as time goes by, thus sustaining token value.

Disclaimer

XIOTRI and the XIOT token are an experimental project. The contract is unaudited at the time of writing. XIOTRI is not registered as a financial advisory service and will not provide financial advice. The community decides the worth of the XIOT and RI tokens and XIOTRI creators are not responsible for financial loss.

XIOT DeFi and Liquidity

Routing liquidity in the DeFI machine is extremely important. Having our most valuable asset, XIOT, on the frontine does nothing to protect that asset which is why we decided for the neccessity of bXIOT. bXIOT will be acting as a border, or a bridge in the liquidity routing table will allow us to build a much more robust system in the long run making both bXIOT and XIOT a fundamental part of our
ecosystem.

bXIOT Platform

Contract Address:

bXIOT Explained

bXIOT tokens will be used in the XIOTRI platform to provide liquidity between XIOT and RI. This will be an asset used in conjunction with XIOT on our platform for liquidity mining, as well as provide an additional asset to be traded in the XIOTRI ecosystem specifically between XIOT and RI.
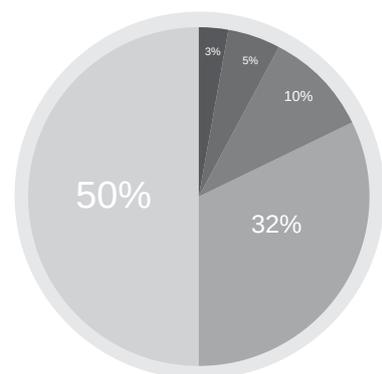

bXIOT Token Allocation

In total 250000 tokens will be minted. 7500 (3%) of bXIOT will be allocated to the team and a further 12500 (5%) will be used for platform development and ongoing maintenance and upgrades.

3300 (10%) will be allocated to market makers. 72000 (32%) will be held in reserve. The remaining 125000 (50%) tokens will be distributed directly to XIOTRI's community of supporters and holders via an airdrop.

100% of bXIOT tokens will be premined and distributed. In total 68% of minted bXIOT will be distributed and 32% will be kept in reserve.

3% Team Fund
5% Development Fund
10% Market Makers
32% Reserve
50% Community Airdrop

Staking

bXIOT is the first official staking asset that XIOTRI has announced for the XIOTRI platform. Distributed as a reward for holding XIOT throughout the development of the XIOTRI platform we aim to bridge the liquidity gap between XIOT and RI, ultimately providing a seamless transactional experience between the two tokens, via bXIOT.

Additionally, with the increased liquidity XIOTRI will be able to scale into future markets, and promote cross platform liquidity.

John and Sally both stake 1 XIOT and an additional asset. John would like his returns in XIOT so John converts his RI using bXIOT back into XIOT. Sally decides she would like her returns in RI so there is no need for her to convert RI into bXIOT.
